

Literacy

We will be encouraging the children to write captions and sentences.

Please support this at home by helping the children to think of their own sentences to write (they don't have to be difficult!) as some children are really struggling with this.

We will also be making sure that we are spelling all tricky words correctly in our writing.

Mathematics

We will be continuing to work with numbers to 20 and beyond. We will be adding, subtracting, doubling and halving with different amounts.

The children's number formation is improving but please keep practising this at home.

Don't Forget!

Our trip to Hall Farm Park on **Monday 26th March!**

Week 1 – 19/02/18

Old McDonald had a farm but which animals has he lost? Follow the clues throughout the week to see if we can find where they have gone?

Down on the Farm!

From Monday 12th – Friday 16th March, we are inviting pets to live in the classroom! If you have a pet that lives in a self-contained cage/tank/habitat please speak to the class teacher. Last year's Reception brought in 7 pets, can we beat that this year?

We will also be walking the children to the lake to see tadpoles, date to follow.

Week 2 – 26/02/18

We will look at what different farm animals eat. We will be sorting them by different categories and looking at similarities and differences.

Week 3 – 05/03/18

Reception will have 10 new classmates as our eggs and incubators arrive to stay for two weeks! We will see live hatchings and be able to hold the chicks in the second week! We will also be watching caterpillars turning into butterflies!

Week 4 – 12/03/18

This is whole school science week! As well as looking at the life cycles going on in our classroom we are also inviting pets in for the week, please see details to the left.

Week 5 – 19/03/18

This is Sports Relief Week! We will be looking at the fastest animal on the farm – horses! Who can run faster? Horses or people? What's the fastest animal in the world? What's the slowest?
