

KS1 Home Learning Tasks Autumn 2, 2018 Which ones will YOU choose?		
TASKS	These tasks are linked to your child's learning journey at school. If you do any other work please feel free to share it.	
Spellings and reading Weekly practice – extra to the six.	Please practice your spellings- it could be in your home learning book – maybe even find their meanings or write them in a sentence. Read 3 times at least a week and record it in your reading diary.	
Maths	We will be looking at 2D and 3D shape, time, position and direction, money, measurements (distance, mass and capacity) and problem-solving. Could you learn about these in a Christmas-related way?	
Literacy	Write a letter to Santa and the elves and send it to the North Pole. Alternatively, write a Christmas or winter-related poem.	
Topic	Plan a local route on a map and follow it. You could link this to position and direction in Maths.	
Science	Could you make some sparkly, fake snow? Look online for instructions of how you could use materials to do this!	
Art/DT	Make a Christmas card using printing. Could you use your hands or feet as a part of the card?	
PE	Make a gymnastics sequence involving 5 different balances that you've learnt in PE lessons.	
Computing	Open a word document, type on it, save it and then find it again in your documents folder.	
Other learning	Could you bake something Christmas-related and link this to measurements in Maths by following a recipe, weighing out the ingredients, reading the weighing scales and timing the baking carefully? Stick a picture in your book of what you've made. You could write out the recipe afterwards or reflect on what went well and what you could change next time.	

If you would prefer worksheets please see your child's teacher.
Your tasks need to be completed and handed in by Wednesday 9th January 2018 (after your Christmas holidays – or hand it in before!)

Green = 6 tasks or more Amber = 4 tasks
